

A "client" has a package.

The "client" gives it to our FedEx delivery person...

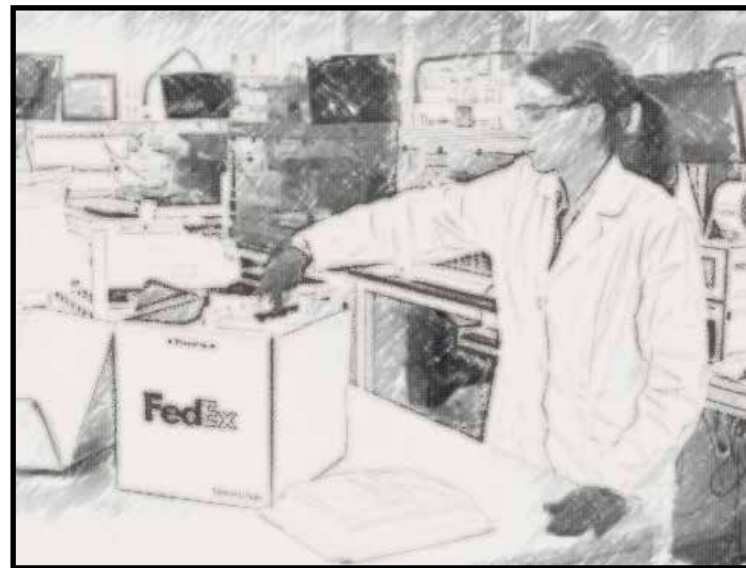

who brings the package to a hospital...

"As customer breakthroughs expand our world, FedEx innovates with new solutions."

and delivers to a lab technician awaiting his arrival.

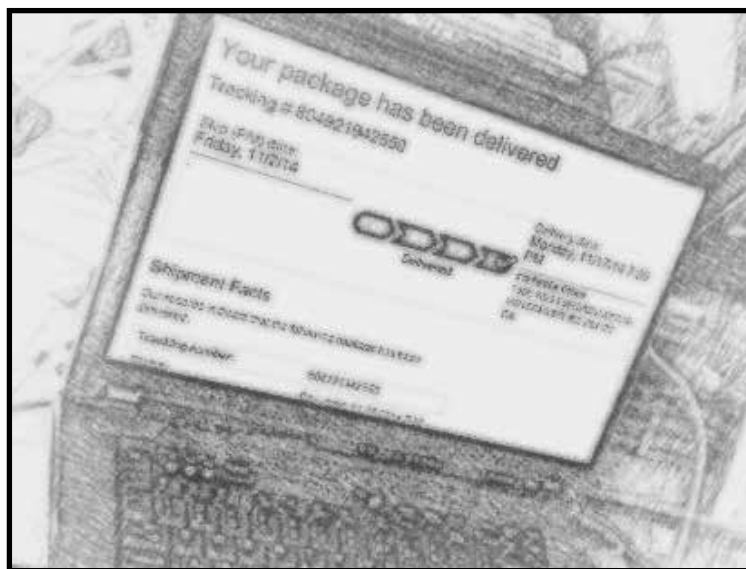

The package is carefully opened in a lab...

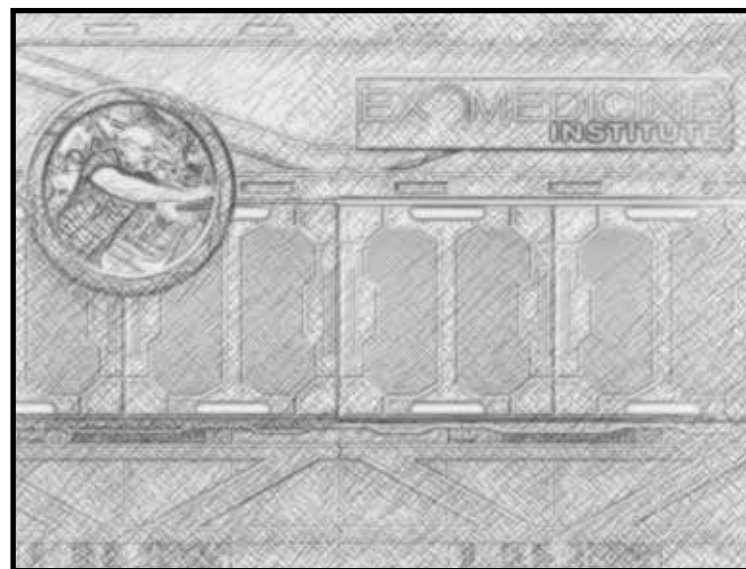

and administered to a patient. After which the confirmation is sent via iPad.

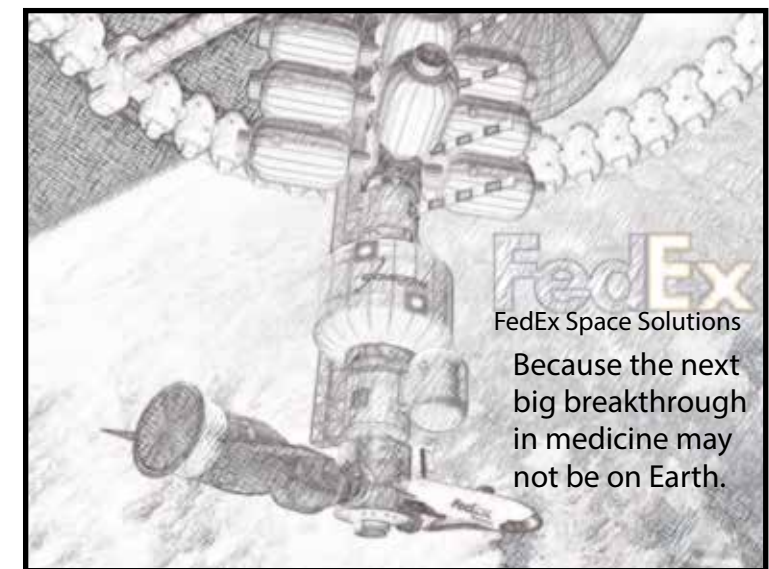

"Whether a simple package moving around the corner, or a controlled-environment,"

The "client" receives confirmation...

and the camera pulls out to reveal that he is an astronaut. The astronaut confirms on his computer/laptop and returns to his work. The camera pulls out to reveal the astronaut is on the Exomed Space Station

Stop on wide shot of the Space Station with tagline & fedex logo.

FedEx
FedEx Space Solutions
Because the next big breakthrough in medicine may not be on Earth.

"FedEx is even there for companies like Exomedicine Institute, because the next big breakthrough in medicine may not be on earth."
